Panic Stations!! aka “ war on piracy”

‘Flexible’ ‘balanced’ copyright
Copyleft, etc??

Anti-Counterfeiting Trade Agreement

“To establish a new standard of intellectual property (IP) enforcement to combat the high levels of commercial scale trade in counterfeit and pirated goods worldwide”

Principles for ACTA negotiations:

- Transparency and accountability
- Presumption of innocence
- Proportionality
- Impact on other treaties and laws
- Mandatory IP filtering a flawed means of general IP enforcement
- Safeguards against liability for intermediaries

The Cutler Review

venturousaustralia

*building strength
in innovation*

“Intellectual property is critical to the creation and successful use of new knowledge – particularly the cumulative use of knowledge as an input to further, better knowledge.”

“[T]here is strong evidence that existing intellectual property arrangements are hampering innovation”

“Recommendation 7.8:

Australian governments should adopt international standards of open publishing as far as possible. Material released for public information by Australian governments should be released under a creative commons license.”

“[O]ne of the major problems here is that intellectual property policy is being managed as a legal issue, whereas although this area like any other must operate through the legal system, intellectual property policy is most fundamentally an aspect of economic policy.”
